Quarter-end as of 03/31/26	QTR	YTD	Since Inception
Market Price	-0.29	-0.29	0.28
Fund NAV	-0.49	-0.49	-0.17
Benchmark ³	-0.05	-0.05	0.09

*Returns less than one year are not annualized

The performance quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted above. Short term performance, in particular, is not a good indication of the fund's future performance, and an investment should not be made based solely on historical returns. Returns beyond 1 year are annualized. A fund's NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding. The market price is the most recent price at which the fund was traded. For performance information current to the most recent month-end, please visit www.voyainvestments.com.

Portfolio Characteristics	Fund
Weighted Average Life (years)	5.17
Duration (years)	4.47
Premium / Discount	0.08%
SEC 30-Day Yield (Unsubd)	4.40%
SEC 30-Day Yield (Subd)	4.40%
Median 30-Day Spread	0.10%

An investor should consider the investment objectives, risks, charges and expenses of the Fund(s) carefully before investing. For a free copy of the Fund's prospectus or summary prospectus, which contains this and other information, visit www.voyaetfs.com or call (800) 334-3444. Please read all materials carefully before investing.

¹ Diversification does not ensure a profit or protect against a loss in a declining market.

Disclosures

² The **Bloomberg U.S. Aggregate Bond Index** is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes treasuries, government-related and corporate securities, fixed-rate agency MBS, ABS and CMBS (agency and non-agency). Index returns do not reflect fees, brokerage commissions, taxes or other expenses of investing. **Investors cannot invest directly in an index.** Source: Bloomberg Index Services Limited. BLOOMBERG® is a trademark and service mark of Bloomberg Finance L.P. and its affiliates (collectively "Bloomberg"). Bloomberg or Bloomberg's licensors own all proprietary rights in the Bloomberg Indices. Bloomberg does not approve or endorse this material, nor guarantee the accuracy or completeness of any information herein, nor make any warranty, express or implied, as to the results to be obtained therefrom and, to the maximum extent allowed by law, shall not have any liability or responsibility for injury or damages arising in connection therewith.

³ Maturity allocations are based on securities' Average Life, which incorporates pre-payment assumptions and can thus be much different than a bond's maturity date, particularly in the case of mortgage-backed securities.

⁴ Credit quality is based on third-party agency ratings, ranging from AAA (highest) to D (lowest). If ratings are available from each of S&P, Moody's and Fitch, the security is assigned the median rating. If ratings are available from only two of these agencies, the lower rating is assigned. If a rating is available from only one of these three agencies, then that rating is used. If none of S&P, Moody's and Fitch rate the security but it has a Morningstar DBRS rating, then the Morningstar DBRS rating is used (see <https://dbrs.morningstar.com/about/disclaimer>). Any security that is not

rated by these four agencies is placed in the Not Rated (NR) category. Quality ratings reflect the credit quality of the underlying securities in the fund's portfolio and not that of the fund itself. Ratings may not accurately reflect risk and are subject to change.

Due to rounding, numbers presented may not add up to 100% and percentages may not precisely reflect the absolute figures.

Investment Risks: All investing involves risks of fluctuating prices and the uncertainties of rates of return and yield inherent in investing. You could lose money on your investment and any of the following risks, among others, could affect investment performance. The following principal risks are presented in alphabetical order which does not imply order of importance or likelihood: Bank Instruments; Buy Back and Dollar Roll; Call; Collateralized Loan Obligations and Other Collateralized Obligations; Counterparty; Credit; Derivatives; Futures; Options; Swaps; Credit Default Swaps; Duration; Economic and Market; Environmental, Social, and Governance; ETF; Foreign (Non-U.S.) Investments/ Developing and Emerging Markets; High Portfolio Turnover; Inflation; Inflation-Indexed Bonds; Interest Rate; Leveraging; Liquidity; Management; Models and Data; Mortgage- and/or Asset-Backed Securities; Municipal Securities; New Fund; Operational; Prepayment and Extension; Sovereign Debt; Structured Notes; TBA; U.S. Government and U.S. Agency Obligations. **Investors should consult the Fund's Prospectus and Statement of Additional Information for a more detailed discussion of the Fund's risks.**

Exchange Traded Funds (ETFs) are bought and sold through exchange trading at market price (not NAV), and are not individually redeemed from the fund. Shares may trade at a premium or discount to their NAV in the secondary market.

Brokerage commissions will reduce returns.

Glossary of Terms:

Duration is the weighted measure of the length of time the bond will pay out. **Premium/Discount Percentage** measures the percentage difference between an ETF's market price and its Net Asset Value (NAV). **SEC30-Day Subsidized Yield (%)** a standardized yield calculation created by the SEC, it reflects the income earned during a 30-day period, after the deduction of the fund's net expenses (net of any expense waivers or reimbursements). **SEC30-Day Unsubsidized Yield (%)** a standardized yield calculation created by the SEC, it reflects the income earned during a 30-day period, after the deduction of the fund's gross expenses. Negative 30-Day SEC Yield results when accrued expenses of the past 30 days exceed the income collected during the past 30 days. **Weighted Average Life Years** the length of time until the average security in a fund will mature or be redeemed by its issuer. It indicates a fund's sensitivity to interest rate changes: longer average weighted maturity implies greater volatility in response to interest rate changes. **30-Day Median Spread** is a calculation of Fund's median bid-ask spread, expressed as a percentage rounded to the nearest hundredth, computed by: identifying the Fund's national best bid and national best offer as of the end of each 10 second interval during each trading day of the last 30 calendar days; dividing the difference between each such bid and offer by the midpoint of the national best bid and national best offer; and identifying the median of those values.
